School Mission

Education is the commitment to a mission and the realization of an ideal: the ideal being to collaborate towards the creation of a positive and caring environment for our students, and the development of a community in which students may realize brotherhood, neighbourliness, patriotism, and worldwide friendships. Moreover, we strive to create a self-improving environment that targets excellence and promotes professionalism.

校長的話

Principal's Message

We have three beliefs.

"Learn to serve, serve to learn"

Positive values can be nurtured through service learning. We serve the children in Tin Ching Estate, the elderly living alone and the careers in our community. QTS students will become considerate, empathetic and respectful.

"Everyone can be a star"

Every QTS student is unique. We create numerous opportunities for students to discover their own potentials and to develop their talents, from rugby teams to STEM classes, from Chinese drum group to English club, from science explorations in Zhuhai to cultural tours in Europe, and from job-tasting programs in the Swire Group to internships in trade companies. We build students' resumes.

"I can make you smile"

QTS is a happy school. Students smile when they learn, when they participate in activities, and when they see themselves grow. On the other hand, QTS students can bring smiles to the faces of the people in need.

支援非華語生，共建和諧校園

Supporting Non-Chinese Students, Building a Harmonious Campus

Our curriculum provides all students with essential life-long learning experiences for whole person development and equips them to meet future challenges. Language barriers might present a challenge for NCS students in adapting to the local education system, pursuing further studies, and looking for employment. With this thought in mind, we are proud to share and further bolster the following measures to support NCS students in our school.

Tailor-made Learning Support

The support we provide for NCS students comes at crucial stages of their learning – from Secondary 1 to 6. We put forth the following measures to make a smooth transition from primary to secondary education:

- Pull-out Learning

We have hired a well-trained NCS teacher to support NCS students who get taken out of class from their regular classroom to receive fundamental Chinese literacy instruction.

- Group Learning

Group learning in non-Chinese lessons provides NCS students with opportunities to collaborate with their Chinese-speaking peers.

- School-based Chinese Language Curriculum

We have designed a school-based Chinese language curriculum with multifarious learning experiences to build NCS students' confidence in using and speaking Chinese. We have also adapted teaching materials to cater for students' needs.

- After-school Homework Support Class

We have provided after-school homework support classes to give NCS students in need extra individual guidance.

- The International General Certificate of Secondary Education (IGCSE) curriculum

The IGCSE curriculum is developed to prepare NCS students for the IGCSE Chinese examination to attain the alternative Chinese qualification in the Hong Kong Diploma of Secondary Education Examination (HKDSE).

Through more opportunities during their schooling, we believe all NCS students can shine and be active members of society!

▪ Cross-curricular Collaboration

Chinese teachers work collaboratively with other Key Learning Area (KLA) teachers to conduct curriculum mapping and design cross-curricular activities to enhance NCS students' Chinese proficiency for learning content subjects in Chinese.

▪ Summer Bridging Programme

The Summer Bridging Programme is designed to help NCS students adapt to the new learning environment and gain exposure to Chinese in a Chinese-medium school environment.

▪ Special Examination Arrangements

We make our utmost effort to cater for NCS students with special needs and we try our best to enable them to take the examination in a fair and appropriate setting.

Inclusive Learning Environment

A hallmark at our school is the "Learning by Doing" approach in which we believe experiential learning experiences can help NCS students find a way to excellence. Students learn best when they are

given the chance to truly immerse themselves in an authentic learning environment and social settings where NCS students can learn with and from Chinese-speaking peers, and comprehend the language or concepts they are learning. Therefore, our school provides a variety of educational and recreational activities such as Hong Kong Schools Speech Festival, visits, study trips, sporting events, club activities, academic competitions and community services to implement the said approach.

Home-school Collaboration

Home-school collaboration is an important step in supporting NCS students' positive engagement in learning and social aspects of school life. Coupled with the crucial role of parents, we can achieve our goals of helping NCS students integrate to a far-greater extent. As such, the school:

- Discusses learning progress with parents on a regular basis;
- Reports student achievements to parents;
- Equips parents with information of school choices and career paths for their children.

營造書香校園，培養終身閱讀

Creating a Reading Campus, Fostering Lifelong Reading

早讀計劃 Morning Reading Programme

本校於每週四、五班主任節全面推行早讀，初、高中隔日交替進行中英文閱讀。中文早讀引領同學透過「e悅讀」平台共賞多元電子書，並輔以圖書館提供的實體書；英文早讀則研讀由英文科精心挑選之優秀文章。師生於班內共同閱讀、教學相長，攜手營造專注且濃厚的校園閱讀氛圍。

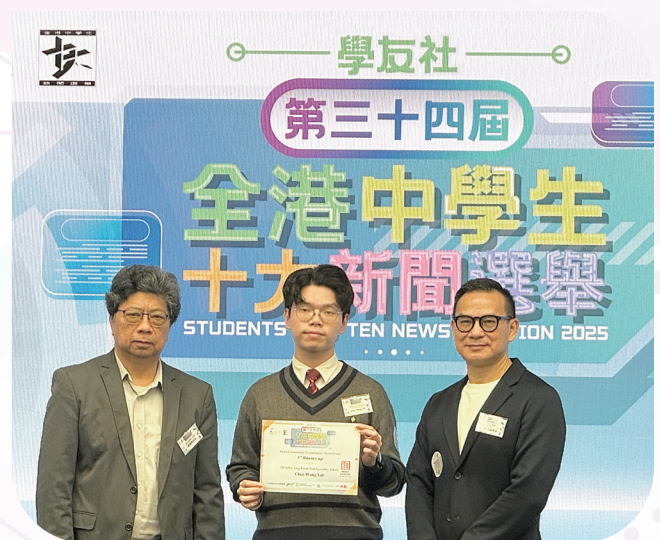

Every Thursday and Friday morning, our school peacefully prepares falls into a peaceful hush for morning reading time. Our junior and senior students alternate between reading Chinese and English books, easing into the day with engaging great stories. On Chinese reading mornings, students explore a universe of digital stories through the "eRead Scheme" or flip through fun library books. On English mornings, they dive into articles handpicked by our teachers. To bring it all together, we host "Good Book Sharing" sessions where students casually share about what they have read. Seeing teachers and students reading side by side in the quiet classrooms creates a beautiful, focused energy that spreads across our whole school.

為響應4月23日「香港全民閱讀日」，本校圖書館聯同中文科組參加了由「一本」讀書會承辦的「香港中小學校2026年閱讀半小時·全民閱讀日」活動。活動期間，師生齊集圖書館一同閱讀，並借閱圖書帶回家完成相關的延伸閱讀任務。

During the event, teachers and students gathered in the library to share the joy of reading together, and students also borrowed books to complete their extended reading tasks at home.

啟航多元才華，實踐百年樹人

Launching Diverse Talents, Fostering Lifelong Growth

本校兩位畢業生透過學校推薦直接錄取計畫（SNDAS）分別獲得香港城市大學及香港理工大學直接錄取！

Two of our graduates were admitted directly to City University of Hong Kong and The Hong Kong Polytechnic University through the School Nominations Direct Admission Scheme (SNDAS)!

本校2024-2025年度畢業生林子傑和鄒鎧澄分別以「學校推薦直接錄取計劃」入讀香港城市大學及香港理工大學，林同學與鄒同學心繫母校，不忘師恩，特意回校寄語師弟妹，分享學習心得與對來的展望。

林同學特別提到大學的面試除了基本的自我介紹、考問學科的知識外，更會考同學的課外知識儲備，他記得當時回應面試的最後一題時，便是結合了物理課本以及網上自學內容作答。鄒同學更補充指以社會學科的面試為例，面試官可能會問及同學對社會時事的認知，對政策的看法等，所以同學切記要多重視儲備課外知識。

談及進入大學的生活，二人都難掩興奮緊張之情，他們提到大學生活雖然變得更加自主，但也意味著要更加自律。因為教授不會主動提醒功課的截止日期，很多事情也要自己負責處理，上課遇到不明白的地方自己也需要主動尋找資源，補充學習內容，因此自律和時間管理變得至關重要。

隨著學校二十週年校慶，兩位畢業生均感謝學校的老師對他們的栽培，並祝願校運昌隆，讓更多學生有機會實現自己的夢想，培養出更多人才，亦期待未來能看到更多優秀的學生邁出校門。

Our 2024–2025 graduates, Lam Tsz Kit and Chow Hoi Ching, were admitted to City University of Hong Kong and The Hong Kong Polytechnic University respectively through the School Nominations Direct Admission Scheme (SNDAS). Holding their alma mater close to their hearts and deeply grateful for their teachers' guidance, they recently returned to campus to share their learning experiences and future aspirations with their younger peers.

Tsz Kit highlighted that university interviews assess more than just basic self-introductions and subject knowledge; they also test students' accumulation of extracurricular knowledge. He recalled successfully answering his final interview question by combining concepts from his physics textbooks with insights from his independent online learning.

Hoi Ching added that in social sciences interviews, for example, interviewers often ask about students' awareness of current affairs and their views on public policies. Therefore, she strongly advised students to prioritize building up their extracurricular knowledge.

When discussing university life, both could not hide their mixture of excitement and nervousness. They noted that while university offers greater independence, it also demands stricter self-discipline. Since professors do not send reminders about assignment deadlines, students must take full ownership of their responsibilities. If they encounter difficulties in class, they need to proactively seek resources to supplement their learning. Consequently, self-discipline and time management become absolutely vital.

In celebration of the school's 20th anniversary, both graduates expressed their heartfelt gratitude to their teachers for their dedication and nurturing care. They wished the school continued prosperity and success in cultivating future talents and helping more students realize their dreams. They also look forward to seeing more outstanding graduates step out of the school gates in the future.

More Than Just a Page: A Day with Cai Lun

3A Yeung Yan Hei

One Monday morning, I walked into my classroom and noticed a new boy sitting beside me. He looked bewildered, curiously touching everything on my desk. "What is this?" he asked, pointing at my pencil case. Then he leaned over to examine my mobile phone. "And this?" he inquired, clearly puzzled.

At first, I thought he was joking. But then he said, "My name is Cai Lun. I invented paper during the Han Dynasty. How did I end up here?"

I was stunned. Cai Lun? The legendary inventor of paper? Without hesitation, I pulled out my History book and showed him a picture. "Is this you?" I asked. He smiled warmly and nodded.

During class, our teacher discussed the Four Great Inventions of ancient China. Cai Lun listened attentively, absorbing every word. After the lesson, he turned to me and said, "I never imagined people would still remember me after so many centuries. I only wanted to make writing easier for everyone."

At lunchtime, I noticed a classmate carelessly throwing away some sheets of paper. Cai Lun's expression turned sorrowful. "Why waste paper like that?" he asked gently. "I worked tirelessly to make paper affordable so that everyone could have access to it. Please, don't take it for granted."

His words made me feel uneasy. I realized how often I waste paper without a second thought. Cai Lun had reminded me that even everyday objects like paper are the result of immense dedication and effort.

Cai Lun stayed with us for just one day. The next morning, he vanished as mysteriously as he had appeared. Yet, his message stayed with me forever. Now, I am more mindful about using paper wisely. I encourage my friends to reduce waste and recycle whenever possible.

Having Cai Lun as my classmate was an incredible experience. He was not only brilliant and kind but also deeply committed to improving the lives of others. I hope one day I can contribute something meaningful to the world, just as he did.
